

Music Therapy at New Jersey School of Music

Music Therapy Sessions for All Ages

- Led by a Board-Certified Music Therapist
- 30 minutes (\$28.50), 45 minutes (\$42.75), or 60 minutes (\$55) at either of our locations
- Home visits may be available dependent upon schedule: 45 minutes (\$45) or 60 minutes (\$60)
- Approved provider for Burlington/Camden CMO and Division of Developmental Disabilities

Examples of common music therapy interventions are listed below:

- Therapeutic music games addressing impulse control, socialization and cognitive stimulation
- Modified music lessons or learning musical concepts using non-traditional approaches
- Simple songwriting/lyric substitution to promote verbalizations/purposeful verbal skills
- Lyric analysis (usually for teenage/adult clients)
- Music assisted relaxation (usually for teenage/adult clients)
- Reminiscence through music (usually for adult clients)
- Singing or instrument playing as a means of aesthetic experience
- Songs focusing on a specific letter or speech sound for those with speech delay/difficulty
- Use of visuals to cue the correct instrument or singing part at the correct time
- Taking turns singing alternating song verses to promote socialization and shared experience
- Songwriting with lyrics incorporating difficult academic concepts (usually to a familiar tune to help with memorizing the academic concept)
- Songs requiring the client to listen to which type of instrument, volume level, or speed to play at which time (thus promoting focus and attention skills)
- Songs incorporating movement of body or instruments to promote attention and focus (often times client is asked to take a turn to choose the movement to promote socialization)
- Use of visual schedule to promote structure and focus as to what is coming next
- Use of “hello” and “goodbye” song to promote structure and familiarity as to when session is beginning/ending
- Incorporation of potential communication device into the music to promote choice making/reward for communicating (for non-verbal clients)
